Re: **Do Not Mix Instructions for Timberline® Series, Prestique® Series and the new Timberline® Prestique® Series of Shingles**

Effective November 1, 2007, GAF-Elk has integrated their Timberline® and Prestique® series of laminated asphalt shingles into the Timberline® Prestique® and Timberline® Natural Shadow series of laminated shingles, North America's #1 selling architectural shingle.

In order to assure that property owners receive their best and safest choice, please be aware that **the following shingles should not be "mixed" on any project:**

Timberline® Series of shingles

Prestique® Series of shingles

Timberline® Prestique® and Timberline® Natural Shadow Series of shingles

Why the "do not mix"? While both the shingles manufactured prior to the integration and those since November 1st are manufactured to meet our promise to protect homeowners' homes, color blend variation will result in a less than satisfactory installation because of the enhancements to our color offerings that were introduced as a part of the new product launch.

Questions? Please contact our Technical Hotline at 1-800-ROOF-411, Option #1 if you have any questions about this or any other questions about our complete line of roofing system solutions.
